PROJECTS

Student Management System [GitHub Link](#)

Developed a Student Management System using **ASP.NET Core and MVC** with support for MySQL, PostgreSQL, and MSSQL. Includes role-based login, attendance and marks management, Redis caching, and multi-logger support (Serilog, NLog, Log4Net).

Student Mentoring System [GitHub Link](#)

Built a Student Mentoring System using Node.js, Express.js, and MongoDB to manage student-mentor interactions. Implemented role-based access for admins, mentors, and students with secure authentication and authorization. Enabled tracking of student progress, meeting schedules, and feedback. Designed RESTful APIs and integrated a responsive frontend for smooth user experience.

NSS Management Application [GitHub Link](#)

Developed an NSS Management Application using React.js (frontend) and Node.js, Express.js, and MongoDB (backend). Implemented secure authentication, role-based access control, and efficient data handling. Designed RESTful APIs to manage Program Officers, Volunteers, Events, and Announcements for seamless coordination and administration.
